EDUCATION

Istanbul Topkapı University, *Computer Programming*

2023-2025

I started my Associate Degree in Computer Programming in 2023 and will graduate in 2025 after completing my mandatory internship.

SKILLS

HTML, CSS, React

Experienced in designing responsive, user-focused interfaces using HTML and CSS. Currently deepening my knowledge in React.js, particularly in component-based architecture, state management, and modern frontend development practices.

JavaScript

Solid foundation in developing web applications using JavaScript and frameworks like Express.js. Emphasis on code readability and maintainability, with continuous learning in modern architectural patterns.

C#

Working with WPF and XAML to design desktop interfaces. Continuously improving my ability to combine intuitive design with functional logic to build full-scale desktop applications.

PROJECTS

GoodByeDPI Manager - *User-Friendly WPF Interface Design*

A simple and intuitive WPF application designed to help users install and configure the GoodByeDPI tool, which bypasses DPI-based internet censorship.

Question Answer API - *Backend Application for a Q&A Platform*

A comprehensive backend project developed for a Stack Overflow-style Q&A platform, featuring user management, authentication, question-answer system, and admin privileges.

CERTIFICATES

BTK Academy
API and API Test
Issued: July 2025

Udemy Course Certificate
Modern Web Development
Issued: April 2025

Udemy Course Certificate
Foundations of Web Development
Issued: November 2024

LANGUAGES

English
B1-B2 level; I can communicate effectively in both writing and speaking.

Turkish
Native; I'm comfortable with both written and spoken communication, including technical and academic contexts.
